

Julian M. Lehrer

707-490-9354 | julianlehrer.me | jmlehrer@ucsc.edu

EDUCATION **University of California, Santa Cruz** *Fall 2018 - Spring 2021 (expected)*
B.A. Computational Mathematics, Minor in Computer Science

EXPERIENCE **Data Science Intern** | *Blackthorn Therapeutics — San Francisco, CA* *Summer 2020*

- Used statistical modeling to research the effects of isolation on depression and anxiety
- Wrote interpretable models in Python (scikit-learn) to be used in future clinical analysis
- Generated a research report and presentation for the company

Data Science Intern | *Startup Genome — San Francisco, CA* *Spring 2020*

- Created deep learning model with Python (Pandas, Keras, NLTK) to classify startup sectors from funding data
- Wrote data engineering pipeline to generate and visualize funding metrics for clients

PROJECTS **Project Portfolio** | <https://github.com/jlehrer1/Projects>

Transparency Project (1st Place CruzHacks 2020)

- A fully interactive website that brings clarity to the political process through interactive data visualizations. Build with Plot.ly and Dash, and hosted live on GCloud.

SQLtoPandas

- Python package to use SQL querying on Pandas DataFrames without creating a SQL database
- Built with Python (pandas, numpy, sqlite3) published on PyPi

InstantEDA

- Python package to instantly generate common exploratory data plots without cleaning your DataFrame
- Built with Python (pandas, numpy, plotly), published on PyPi

DrivenData: DengueAI

- Used a combination of engineered lagged features and fourier models to achieve a top 11.8% score globally (so far) on the DrivenData Dengue fever prediction contest
- Built with Pandas, Scikit-learn and Tensorflow

SKILLS **Programming:** Python (scikit-learn, Pandas, Numpy, Tensorflow, Plotly), Swift, SQL, Java, C, C++, Matlab

Theory: Statistical models, machine learning, deep learning, numerical optimization, numerical methods

Software: AWS Elastic Beanstalk, AWS Lambda, Git, Bash
