

# Julian M. Lehrer

---

707-490-9354 | [julianlehrer.me](http://julianlehrer.me) | [jmlehrer@ucsc.edu](mailto:jmlehrer@ucsc.edu)

EDUCATION	<b>University of California, Santa Cruz</b> <i>Fall 2018 - Spring 2021 (expected)</i> B.A. Computational Mathematics, Minor in Computer Science
EXPERIENCE	<b>Data Science Intern</b>   <i>Blackthorn Therapeutics — San Francisco, CA</i> <i>Summer 2020</i> <ul style="list-style-type: none"><li>• Used statistical modeling to research the effects of isolation on depression and anxiety</li><li>• Wrote interpretable models in Python (scikit-learn) to be used in future clinical analysis</li><li>• Generated a research report and presentation for the company</li></ul> <b>Data Science Intern</b>   <i>Startup Genome — San Francisco, CA</i> <i>Spring 2020</i> <ul style="list-style-type: none"><li>• Created deep learning model with Python (Pandas, Keras, NLTK) to classify startup sectors from funding data</li><li>• Wrote data engineering pipeline to generate and visualize funding metrics for clients</li></ul>
PROJECTS	<b>Project Portfolio</b>   <a href="https://github.com/jlehrer1/Projects">https://github.com/jlehrer1/Projects</a> <b>Transparency Project (1st Place CruzHacks 2020)</b> <ul style="list-style-type: none"><li>• A fully interactive website that brings clarity to the political process through interactive data visualizations. Build with Plot.ly and Dash, and hosted live on GCloud.</li></ul> <b>InstantEDA</b> <ul style="list-style-type: none"><li>• Python package to instantly generate common exploratory data plots without cleaning your DataFrame</li><li>• Built with Pandas, Numpy, and Plotly, published on PyPi</li></ul> <b>DrivenData: DengueAI</b> <ul style="list-style-type: none"><li>• Used a combination of engineered lagged features and fourier models to achieve a top 11.8% score globally (so far) on the DrivenData Dengue fever prediction contest</li><li>• Built with Pandas, Scikit-learn and Tensorflow</li></ul>
SKILLS	<b>Programming:</b> Python (scikit-learn, Pandas, Numpy, Tensorflow, Plotly), Swift, Java, C, C++, Matlab <b>Theory:</b> Statistical models, machine learning, deep learning, numerical optimization, numerical methods <b>Software:</b> AWS Elastic Beanstalk, AWS Lambda, Git, Bash
